

Dolichos biflorus Lectin (DBA) - AP (Alkaline Phosphatase)

Cat PL00426

Size 1 mg

Sugar Specificity

α -N-Acetylgalactosamine

Description

Alkaline phosphatase (AP) is coupled to Dolichos biflorus lectin (DBA) and has shown binding to DBA in a variety of applications such as Western blotting and ELISA. Alkaline phosphatase is a large protein (140 kDa) that catalyzes the hydrolysis of phosphate groups in the substrate to produce color or fluorescent products. The optimal enzyme activity of this protein is between pH 8 and 10, and its reaction rate remains linear with increased sensitivity over time.

Abbreviation

DBA

Material Source

Horse gram

Conjugate

Alkaline Phosphatase (AP)

Concentration

1 mg/mL

Purity

High Purity Grade

Shelf Life

1 year

Blood Group Specificity

Non-specific

Sugar Specificity

α -N-Acetylgalactosamine

Inhibiting or Eluting Sugar

N-Acetylgalactosamine

Divalent Ions

Ca⁺⁺, Mn⁺⁺, Mg⁺⁺, Zn⁺⁺

Mitogenic Activity

No

Format

Liquid

Storage

2-8°C

Hazardous Shipping

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY

Dolichos biflorus Lectin (DBA) - AP (Alkaline Phosphatase)

Cat *PL00426*

Size *1 mg*

Non-hazardous

FOR RESEARCH OR FURTHER MANUFACTURING USE ONLY
